DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is not clear the ratio what Applicant is trying to express by using the weight ratio relation “ 5 to 5 ~ 6 to 4”. It seems like there is a comparison of the weight ratio of three components instead of two. The Examiner was not able to figure out its meaning from either the specification or the examples provided.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant uses the acronym “PP” in the claims. This is improper since it can represent an indefinite number of terms. If Applicant is referring to polypropylene, then it should appear in the claims.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear the ratio what Applicant is trying to express by using “ 5 to 5 ~ 6 to

4". It seems like there is a comparison of the weight ratio of three components. The Examiner was not able to figure out its meaning from either the specification or the examples provided.

4. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. On line 5 of claim 1, Applicant claims "PP foaming *fiber* adhered..." Is Applicant trying to refer to a foaming *resin* instead? It is not clear from the specification ~~of~~ what a foaming fiber is.

5. Claim 5 recites the limitation "the PP foaming resin" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

SUGAWARA et al. (US 6,524,691)

DE 2034089A

FR 2287333A – discloses a lining fabric for e.g. vehicle doors, ceilings etc. comprises a fibre mat impregnated with thermosetting resin and sandwiched between a rigid base and a plastic film. (Abstract)

Van der Kooy (US 5,037,690) – discloses a shaped product comprising a sheet material of polyurethane resin material reinforced with binder-free natural-fibre material, such as jute, flax, hemp, coir, ampas, ramie or cotton, possibly combined with polypropylene, polyethylene and /or glass fibers. A preferred fibre material is jute, preferably in the form of jute needle felt. (Abstract)
